

Question Description	Answer Choice 1	Answer Choice 2	Answer Choice 3	Answer Choice 4	Correct Answer Choice
What is the purpose of the 'super()' keyword in a subclass constructor?	To call the subcla	To call the super	To call a method	To call a method in the superclass	2
Which keyword is used to allocate memory for an object in Java?	allocate	memory	new	create	3
What is required for method overloading to occur?	Different return ty	Different paramet	Same parameter	Different access modifiers	2
Can an abstract class be instantiated directly?	Yes	No	Only with interfac	Only with static methods	2
How is multiple inheritance achieved in Java?	Using classes	Using interfaces	Using abstract cl	Using final classes	2
How do you access a static method in a class?	Using an object c	Using the class n	Using the 'this' ke	Using the 'super' keyword	2
What does the 'this' keyword refer to within an instance method?	The current class	The current objec	The superclass	The interface	2
What happens if you try to change the value of a 'final' variable?	The value changi	Compilation error	Runtime error	The value is ignored	2
What is constructor chaining in Java?	Calling multiple c	Calling a constru	Calling a constru	Calling a constructor from the same class	4
If an object of a subclass is assigned to a superclass reference, which version of an overridden method is called?	Superclass versio	Subclass version	Both versions	Random version	2
What is the principle of encapsulation in object-oriented programming?	Hiding implement	Inheriting proper	Defining multiple	Creating abstract classes	1
What is the default access modifier for constants declared in an interface?	private	protected	public	default	3
What constitutes a method signature in Java?	Method name and	Method name and	Method name and	Method name and exception list	2
Can an abstract class have constructors?	Yes	No	Only if they are p	Only if they are static	1
What keyword is used to create a subclass from a superclass?	implements	inherit	extends	include	3
Which method is used to create a copy of an object in Java?	copy()	clone()	duplicate()	createCopy()	2
What happens when a subclass defines a static method with the same signature as a superclass static method?	Method overriding	Method overload	Method hiding	Method shadowing	3
Which method is used to convert a String to an Integer object?	parseInt()	valueOf()	toInteger()	convertInt()	2
What can an array of a superclass type hold?	Only objects of th	Only objects of th	Objects of both s	Only primitive data types	3
What happens when a class is declared as 'final'?	It can be extende	It cannot be exte	It can be instantia	It can only be instantiated once	2
